4-H Curriculum Plan & Guidelines

The plan is to complete 20 lessons each year for a total of 100 lessons in a 5-year plan.

- **Veterinary Science Lesson Plan Model**
- **Group Lessons**: Schedule 10 group lessons; have 1 or 2 lessons in 6-10 group classes.
- **Individual Lessons**: Assign 10 individual lessons for home study; these will not be scheduled as one of the 10 group lessons.
- **Lesson Questions**: Assign the questions, when listed, under question section of the 10 group lessons and the 10 individual lessons. Answers are collected for grading after each scheduled group lesson class and each assigned individual home study lesson.

The plan is to complete 10 activities each year for a total 50 activities in a 5-year plan.

- **Group Activities**: Schedule 5 group activities after completion of associated lesson. If listed, activities are suggested under Activities section and can be selected from 10 assigned individual lessons. A group activity can be scheduled at the same time for a group lesson class, to reduce the number times to meet for 10 lessons and 5 activities. Group activities other than those suggested can be developed. In an activity, students write a report for a grade by following instructions of the suggested activity. One or two educational tours are often scheduled as one or two group activities of the 5 group activities, such as College of Veterinary Medicine Open House, animal facilities/operations and veterinary facilities. These tours must be associated with lessons.

- **Individual Activities**: Assign 5 individual activities after completion of associated lessons. Consider selection from Activities section of the 10 scheduled group lessons. The students are to do these activities on their own; either alone or with a student or two. This is in contrast to a group activity which is for all of them to do together. Individual activities other than those suggested can be developed and assigned. At times, it could be appropriate for an individual activity to be done during a group lesson or group activity. Most times, an individual activity is done on their own time, unrelated to a time for group meetings. In an activity, the student write report for a grade following instructions of the assigned activity.
