### Chapter 4 - Lesson 6 Breeds of Dogs & Cats

#### Activities

1. Study the illustrations and descriptions of the breeds of dogs and cats in reference books and become familiar with their colors and sizes. Be able to recognize the common breeds.
2. Study the wall charts of breeds of dogs and cats at a veterinarian's office.
3. Observe five dogs in your area and classify them as purebred or crossbred and as either small, medium, or large.
4. Observe five cats in your area and classify them either as longhaired or shorthaired.

| Identify Breeds and Sizes of Dogs |           |       |        |       |
|-----------------------------------|-----------|-------|--------|-------|
| Purebred                          | Crossbred | Small | Medium | Large |
|                                   |           |       |        |       |
|                                   |           |       |        |       |
|                                   |           |       |        |       |
|                                   |           |       |        |       |
|                                   |           |       |        |       |

| Identifying Groups of Cats |            |     |
|----------------------------|------------|-----|
| Shorthaired                | Longhaired | Rex |
|                            |            |     |
|                            |            |     |
|                            |            |     |
|                            |            |     |
|                            |            |     |
