Chapter 5 - Lesson 3

Nutrition & Management of Livestock

Activities

1. Study and evaluate a mixed feed for livestock:
 - a. Identify the different feedstuffs in the mixed feed.
 - b. Group the different feedstuffs in the mixed feed as roughages, concentrates, or supplements.
 - c. Record the percentages of protein, fiber, and fat listed on the label of the mixed feed.
2. Tour a feed mill and observe the different feedstuffs being used in feed.
3. Observe some livestock in your area and classify them based on the diet that is available to them.
