Chapter 15 - Lesson 5 Collecting & Handling Semen

Collecting & Handling Semen		
Questions		
1.	List three reasons for collecting semen.	
2.	Give an example of a method, and a reason why each would be used, for collecting semen from a bull, stallion, boar, dog, and cat.	
3.	Describe the color, consistency, and morphology of normal, good quality semen.	
4.	Name and define the two types of abnormal sperm deformities.	
5.	Why is semen extended?	
6.	At what temperature should frozen semen be thawed for immediate use?	
7.	Why is semen collecting and handling to be done carefully and with sanitary practices?	
8.	What method should be used to thaw frozen semen for later use?
