Chapter 16 - Lesson 11
Drug Residue Avoidance Program

Questions

1. Explain how the meat and milk supplies in the United States are monitored for drug residues.

2. Explain what the “milk withdrawal time” of a drug is.

3. Explain the withdrawal time of a drug for slaughter after the drug is administered to a market steer.

4. List items that must appear on the drug label for proper administration of the drug to an animal.

5. Explain the veterinarian/client/patient relationship requirement for extra label use of a drug by a veterinarian.
